

Buy what you need, not what's available

Pharmacokinetic and toxicokinetic analysis require specialized software, but most available tools come loaded with features, many of which go unused. **More than 90%** of daily tasks rely solely on **non-compartmental analysis (NCA)**, while users end up paying for an array of additional functionalities.

Aplos NCA offers a **tailored solution**, focusing exclusively on NCA with unmatched speed and accuracy. This targeted approach ensures that you only pay for the functionality you need, leading to **significant savings** on licensing fees while delivering unmatched efficiency.

Why choose Aplos NCA?

Precision & Speed

- **Faster Analysis:** Aplos NCA is 4x faster than traditional solutions, getting your results in less than 35 seconds compared to hours.

Flexible Integration

- **Integrate with Existing Tools:** Aplos NCA integrates seamlessly with tools like R, SAS, and GraphPad, enabling efficient data manipulation and visualization.

Achieve 75% Annual Savings on Licensing Costs with Aplos NCA

Example – Mid-Size Team(40 analysts):

- **Current licensing costs:** \$400,000 annually
- **With Aplos:** \$45,000 for NCA-focused licenses + \$40,000 for shared licenses for non-NCA work = \$85,000 total
- **Annual Savings:** \$315,000 (over 75%)
