

Aplos NCA: Expand your offerings, not your costs

Automated and Compliant, PK reporting
in days, not weeks

The CRO challenge

Time delays cost you money and leave your client dissatisfied. Every manual process slows down your team.

Top CRO Pain Points

SLOW TURNAROUND

Traditional NCA workflows take 6–8 weeks for larger studies

ANALYST BOTTLENECKS

Relying on external PK/TK analysts can ruin your timeline

NON-STANDARD REPORTING

Outputs are different for every study making automation impossible and QA audits are lengthy

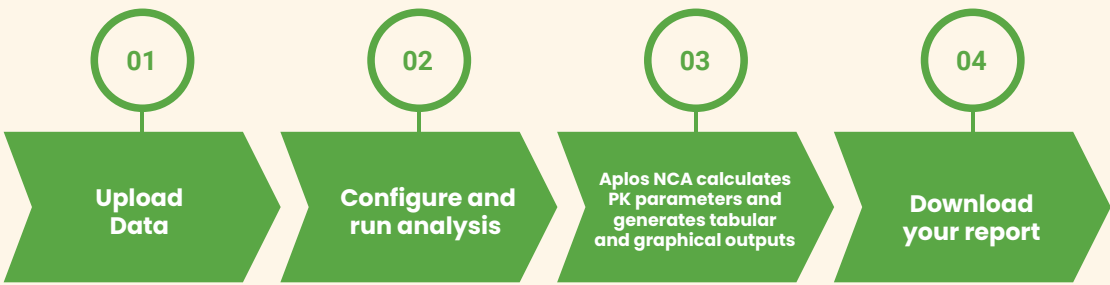

LOST OPPORTUNITIES

Delayed reports mean unhappy clients and fewer repeat studies

Aplos NCA Solves It

Aplos automates the entire NCA reporting workflow – from raw data to submission-ready outputs.

Time and Cost Savings You Can Measure

CROs running **50–study projects** often spend **6 to 8 weeks from raw data to final**, compliant NCA reports. That includes manual data handling, report generation, and multiple QC loops across tools like Phoenix, R, and Excel.

Metric	Traditional Workflow	With Aplos NCA
Average time per study	6–10 hours	<1 hour
Average time per study	~300–500 hours	~30–40 hours
Turnaround time	6–8 weeks	1–2 weeks
Analyst rework / QC burden	High (manual errors, inconsistencies)	Minimal (standardized, automated)
Tool/License overhead	Multiple tools, manual reports	All-in-one, cloud-based

Direct ROI for CROs

Reduce time, costs, and risk, while increasing output volume and client satisfaction.

Business Value Delivered:

- ✓ 3x faster client delivery
- ✓ 80% reduction in analyst processing time
- ✓ Zero software to install, zero IT overhead, validation tools included
- ✓ 21 CFR Part 11 Compliant
- ✓ ISO 27001-secured cloud (AWS)
- ✓ Standardized, version-controlled output
